

SUB-COMMITTEE ON IMPLEMENTATION
OF IMO INSTRUMENTS
2nd session
Agenda item 6

III 2/6/3
26 March 2015
Original: ENGLISH

**ANALYSIS OF CASUALTY AND PSC DATA TO IDENTIFY TRENDS AND DEVELOP
KNOWLEDGE AND RISK-BASED RECOMMENDATIONS**

**Status of reports and analyses on very serious marine casualties (VSMC)
which have occurred since 1 January 2010 involving SOLAS ships**

Note by the Secretariat

SUMMARY

Executive summary: This document provides information on data generated by the Marine Casualties and Incident (MCI) module of the Global Integrated Shipping Information System (GISIS) regarding very serious marine casualties involving SOLAS ships

Strategic direction: 12

High-level action: 12.1.2

Planned output: 12.1.2.1

Action to be taken: Paragraph 6

Related documents: III 2/6 and III 2/6/1

1 The Sub-Committee requested the Secretariat to report on the status of reports and analyses of very serious marine casualties (VSMC), involving ships covered by SOLAS, based on data registered since 1 January 2010 and extracted automatically from GISIS, including, but not limited to, the referenced numbers of the incidents, the name of the ship(s) involved, the date/time of the incidents, the number of investigation reports submitted and the date of submission of the investigation reports (III 1/18, paragraph 5.26).

2 The condition of whether the ships involved are covered by SOLAS or not at the time of the incident is not currently requested from flag and other reporting Administrations or the Secretariat when recording the information on VSMC, marine casualties and marine incidents into the Marine Casualties and Incident (MCI) module. Consequently, such information was not readily available in GISIS-MCI to carry out the task requested by III 1.

3 In this context, the Secretariat has reviewed all VSMC registered in GISIS-MCI, which occurred from 1 January 2010 to March 2015 and has tentatively identified those ships that

were considered to be covered by SOLAS at the time of the occurrences, to be displayed in the module. This information is presented in the annex as table 1 – VSMC of SOLAS ships and VSMC for which one report or more were submitted per year since 2010 and table 2 – List of VSMC per year since 2010.

4 The identification of the SOLAS or non-SOLAS condition of the ships raises the need for this information to be validated by the flag and other reporting Administrations involved, as appropriate. In this context, the Secretariat is creating in GISIS/MCI the option to identify the condition of the ship at the time of the occurrence with regard to SOLAS (i.e. SOLAS, Non-SOLAS or Unknown/Unspecified, the latter being the option by default). The Sub-Committee may wish to invite flag and other reporting Administrations to review existing records and to validate the condition of the ships with regard to SOLAS, in particular, for very serious marine casualties (VSMC) which have occurred since 1 January 2010.

5 Furthermore, in order to maintain accurate records in GISIS-MCI in the future, flag and other reporting Administrations should be invited to select one of the three above-mentioned options when recording any new occurrence into GISIS-MCI. The Secretariat will periodically review those records showing the "Unknown/Unspecified" option as a secondary measure to assist in maintaining the classification as accurate as possible.

Action requested of the Sub-Committee

6 The Sub-Committee is invited to note the information provided, to decide, as appropriate, and, in particular, to:

- .1 invite flag and/or other reporting Administrations to review existing records and to validate the condition of the ships with regard to SOLAS, as tentatively identified by the Secretariat in GISIS-MCI, in particular, for very serious marine casualties (VSMC) which have occurred since 1 January 2010 (paragraphs 3 and 4); and
- .2 invite flag and other reporting Administrations to select the condition of the ship as SOLAS, Non-SOLAS or Unknown/Unspecified when recording new occurrences into GISIS-MCI (paragraph 5).

ANNEX

Table 1
VSMC of SOLAS ships, per year since 2010 until March 2015

Year	Number of VSMC of SOLAS ships	Number of VSMC for which one report or more were received
2015	6	0
2014	46	7
2013	97	58
2012	106	65
2011	110	55
2010	126	63
Totals:	491	248

Table 2
List of VSMC of SOLAS ships per year since 2010 until March 2015
